khanatikfaisal

SUMMARY

Motivated Software Engineer with experience in designing and developing scalable web applications and enterprise software using Next.js, Django, NestJS, and modern JavaScript technologies. Experienced in building both frontend and backend solutions for production and in-house business applications, including IoT platforms, property management systems, and enterprise digital products. Passionate about writing clean, maintainable code, optimizing application performance, and delivering intuitive user experiences. Thrive in agile environments, collaborating with cross-functional teams to transform business requirements into reliable, high-quality software while continuously learning and embracing new technologies.

WORK EXPERIENCE

ACI PLC ACI Centre 245, Tejgaon Industrial Area, Dhaka

Software Engineer October 2025 - Present

- Develop and maintain enterprise-grade in-house and production software solutions supporting ACI's digital transformation initiatives.
- Design and implement scalable frontend and backend features using modern web technologies, ensuring high performance and maintainable architecture.
- Developed the complete frontend of Sereno Levande, ACI's property management platform, delivering responsive and intuitive user experiences.
- Designed and developed both the frontend and backend of an IoT-based fleet and vehicle monitoring platform, integrating real-time data visualization and device communication.
- Build and integrate RESTful APIs to improve system interoperability, data consistency, and business process automation.
- Refactor existing frontend and backend architectures to enhance scalability, performance, code quality, and long-term maintainability.
- Implement interactive geospatial features using React Leaflet for real-time location tracking and map-based visualization.
- Collaborate closely with business stakeholders, UI/UX designers, QA engineers, and cross-functional development teams to deliver reliable, production-ready software.
- Participate in requirement analysis, sprint planning, code reviews, testing, deployment, and production releases to ensure high-quality software delivery.
- Contribute to the continuous improvement of development practices by identifying optimization opportunities and implementing scalable technical solutions.
- Implemented SEO best practices, integrated Google Analytics and Meta Pixel, and configured Content Security Policy (CSP) to improve search visibility, user analytics, marketing insights, and application security for the Sereno Levande platform.

Deep Mind Labs Uttara, Dhaka

Frontend Developer March 2025 - September 2025

- Collaborated closely with UI/UX designers, AI, and backend engineers to ensure seamless integration of frontend features in an agile Scrum environment.
- Developed responsive, user-friendly interfaces for in-house healthcare products and multiple client projects.
- Built and integrated chatbot systems powered by LLM to enhance user interaction and automate workflows.
- Contributed to designing and developing interfaces that effectively visualize AI-generated insights and healthcare data.
- Performed manual annotation of medical and general objects using HTML5 Canvas to support AI training and data labeling.
- Participated in sprint planning, daily stand-ups, and retrospectives to align development efforts with team goals and client requirements.

6sense Technologies Banasree, Dhaka, Bangladesh
Frontend Developer (Intern) November 2024 - March 2025

- Collaborated with cross-functional teams, including Development, UI/UX, Testing, and Project Management, to ensure seamless project execution.
- Developed and integrated three internal projects, ensuring optimal performance and scalability.
- Successfully implemented new features and enhancements, improving project functionality and user experience.
- Conducted thorough unit tests and integration tests, guaranteeing code quality and reliability.
- Actively participated in Agile Scrum ceremonies, including daily standups, sprint planning, and retrospectives, to maintain team alignment and project momentum.
- Contributed to the refinement and execution of project goals through effective communication and teamwork.

Deepchain Labs Uttara, Dhaka, Bangladesh
Frontend Developer (Contractual) | Remote August 2024 – October 2024

- Developed frontend web interface for a finance-focused website and web application.
- Developed interactive custom charts to visualize financial statistics.
- Assisted backend developer in the frontend integration phase.
- Performed unit testing & smoke testing of the entire website by following proper test case documentation.
- Followed agile methodologies throughout the development and testing phase.

SKILLS

Development

React JS, Next JS, django, Nest JS, ASP .NET, JavaScript, TypeScript, C#, Python, Redux, Context API, Tanstack Query, Tailwind CSS, HTML, CSS, Axios, Shadcn, Framer Motion, Oracle, MySQL, MSSQL, PostgreSQL, Auth JS

Tools:

Trello, GitHub, Postman, hoppscotch, Swagger, Docker, VS Code, Slack, Jest, Playwright, Jira, Refine

Professional Attributes:

Adaptive Learner, Team Player, Analytical Thinker, Quick Learner, Time Management, Leadership, Project Management

Interests

Devops, Full-Stack Development, Data Science, IoT

PROJECTS

Digicraft Hospital Management System

- Role-based features for Doctor, Staff, Patient, and Super Admin (System Owner).
- Multi-tenancy implementation for SaaS Based software deployment.

- Integrated Medical AI Chatbot for streamlining the user experience.

All in One Parcel Management System

- Role-based features for Management and Staff to fulfill parcel company needs.
- Parcel tracking and Fare estimation system.
- Dynamic searching and Ban system

EDUCATION

American Internation University-Bangladesh (AIUB) Major: Software Engineering • CGPA: 3.95
Bachelors of Science in CSE February 2021 - December 2024

Milestone College Major: Science • GPA: 5.00
HSC July 2017 - December 2020

AWARDS

Dean's List Honors
American International University - Bangladesh (AIUB)
4x Award Winner
